

**Unless Congress and the President act,
healthcare for four million more kids
will remain just out of reach.**

Last year alone, 600,000 children lost their health insurance. In just a few days, the highly successful State Children's Health Insurance Program — SCHIP — is set to expire.

If we renew and fully fund SCHIP, we can provide healthcare coverage for four million more kids. For these kids, it means

immunizations and regular checkups... the right start for a healthier life.

Call your Congressman and the President today and urge them to renew and fully fund SCHIP, the children's health program. Unless they act, healthcare for four million more kids will remain just out of reach.

We must renew and fully fund the State Children's Health Insurance Program
